INFOBLOX UNIVERSAL DDI PRODUCT SUITE

INTRODUCING UNIVERSAL DDI MANAGEMENT

Infoblox Universal DDI Management is the common management solution for operations and automation for both NetOps and CloudOps.

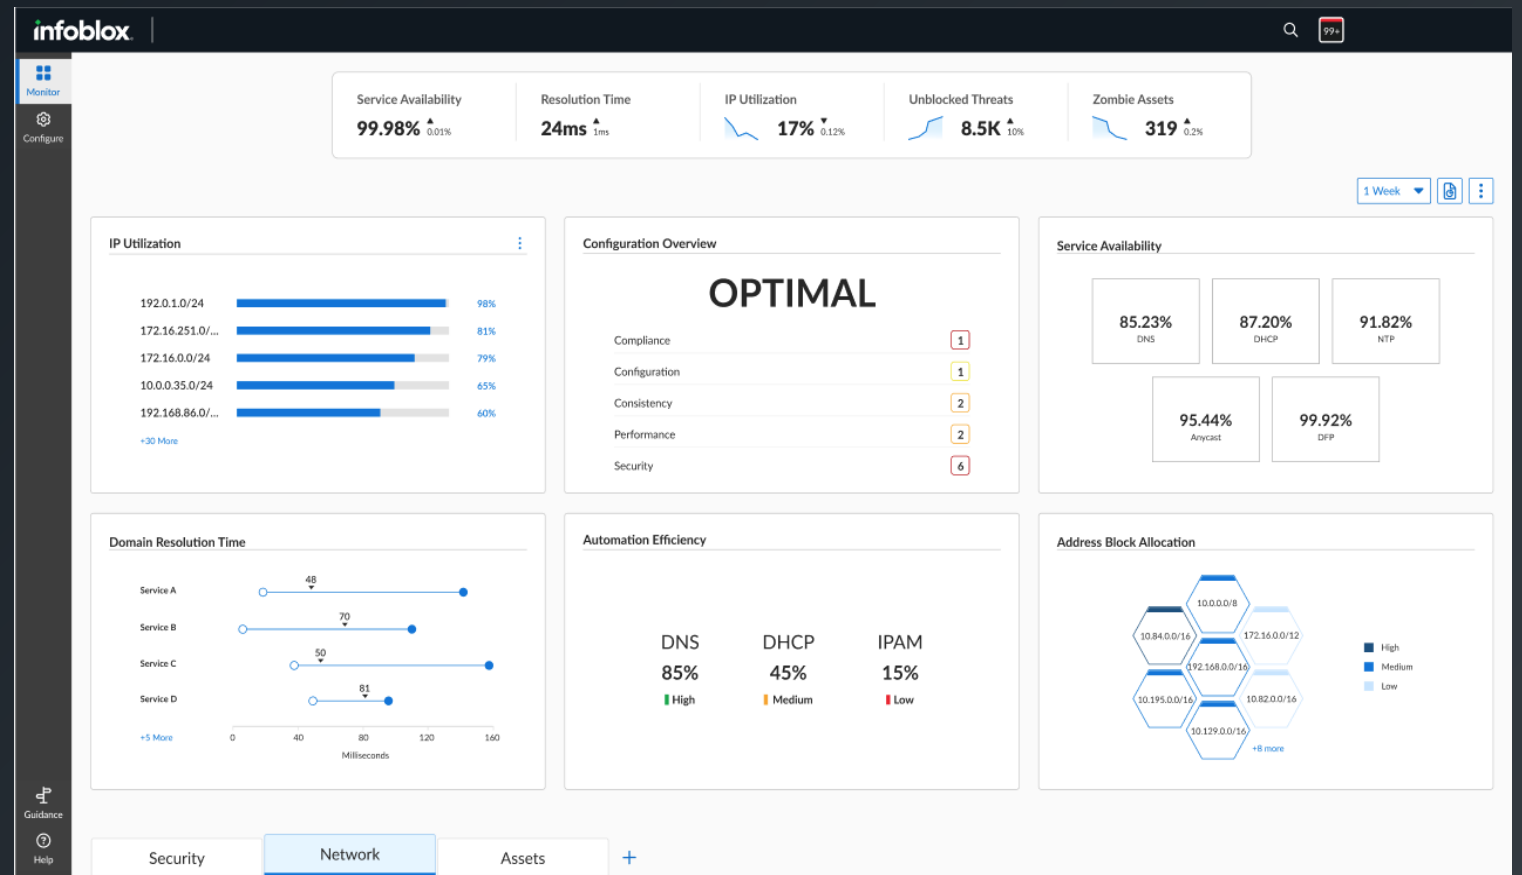

UNIVERSAL DDI MANAGEMENT KEY CAPABILITIES

Unified management of all critical network services across the entire infrastructure improving efficiency, consistency and reliability of services in hybrid and multi-cloud environments.

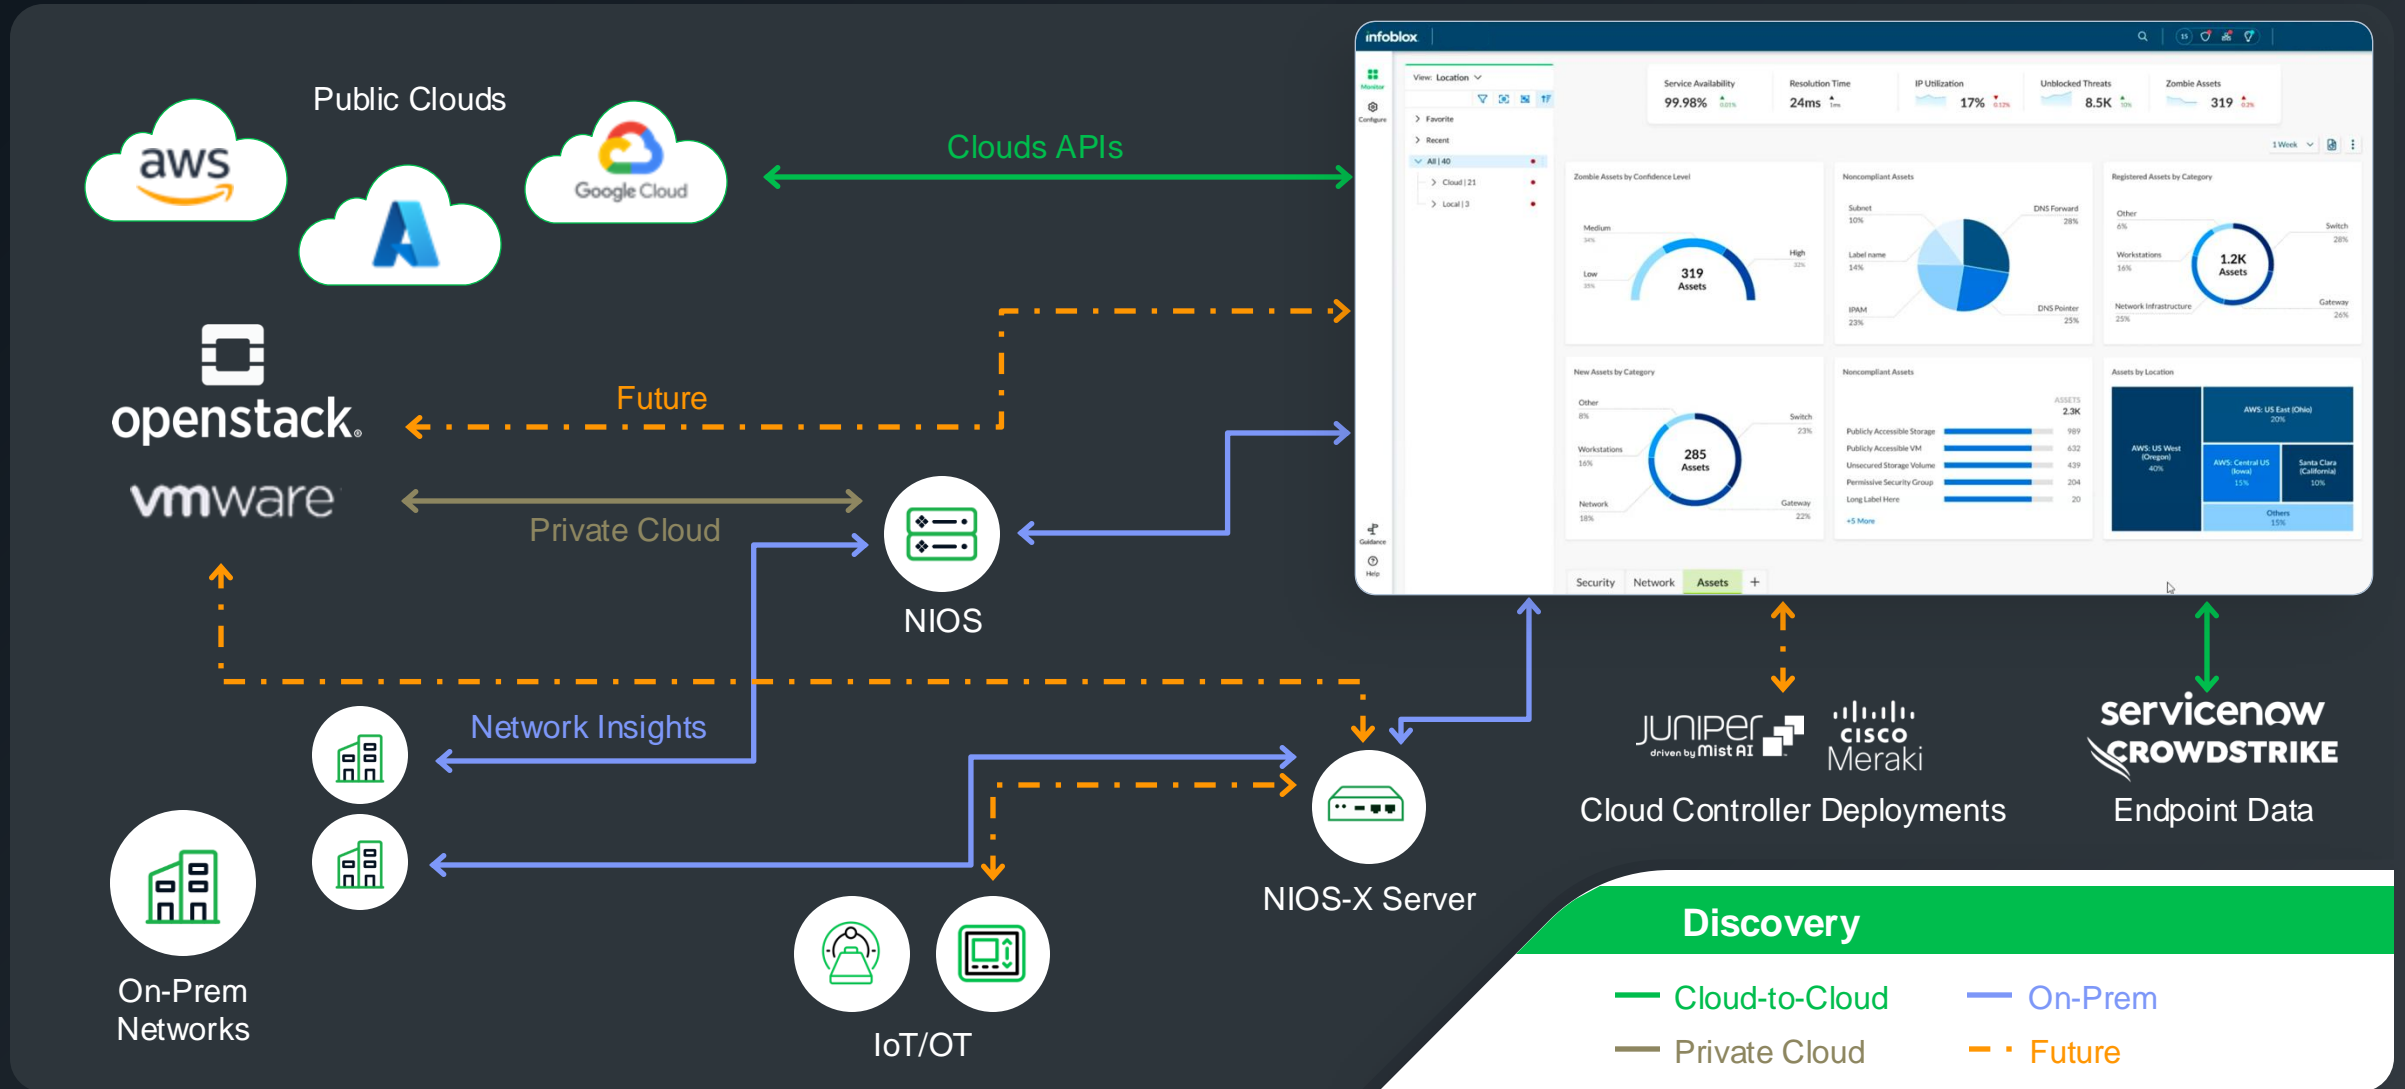

Unifies DNS Zone Management across public cloud providers for simplified management

Defines and ensures unique IP address mapping across cloud providers to prevent outages

Assigns admin rights to network segments or compartments for granular control of resources

INTRODUCING INFOBLOX UNIVERSAL ASSET INSIGHTS

UNIVERSAL ASSET INSIGHTS KEY CAPABILITIES

Automated discovery and analysis of assets across the broadest set of sources in the industry, delivering unmatched visibility and insights in hybrid and multi-cloud environments

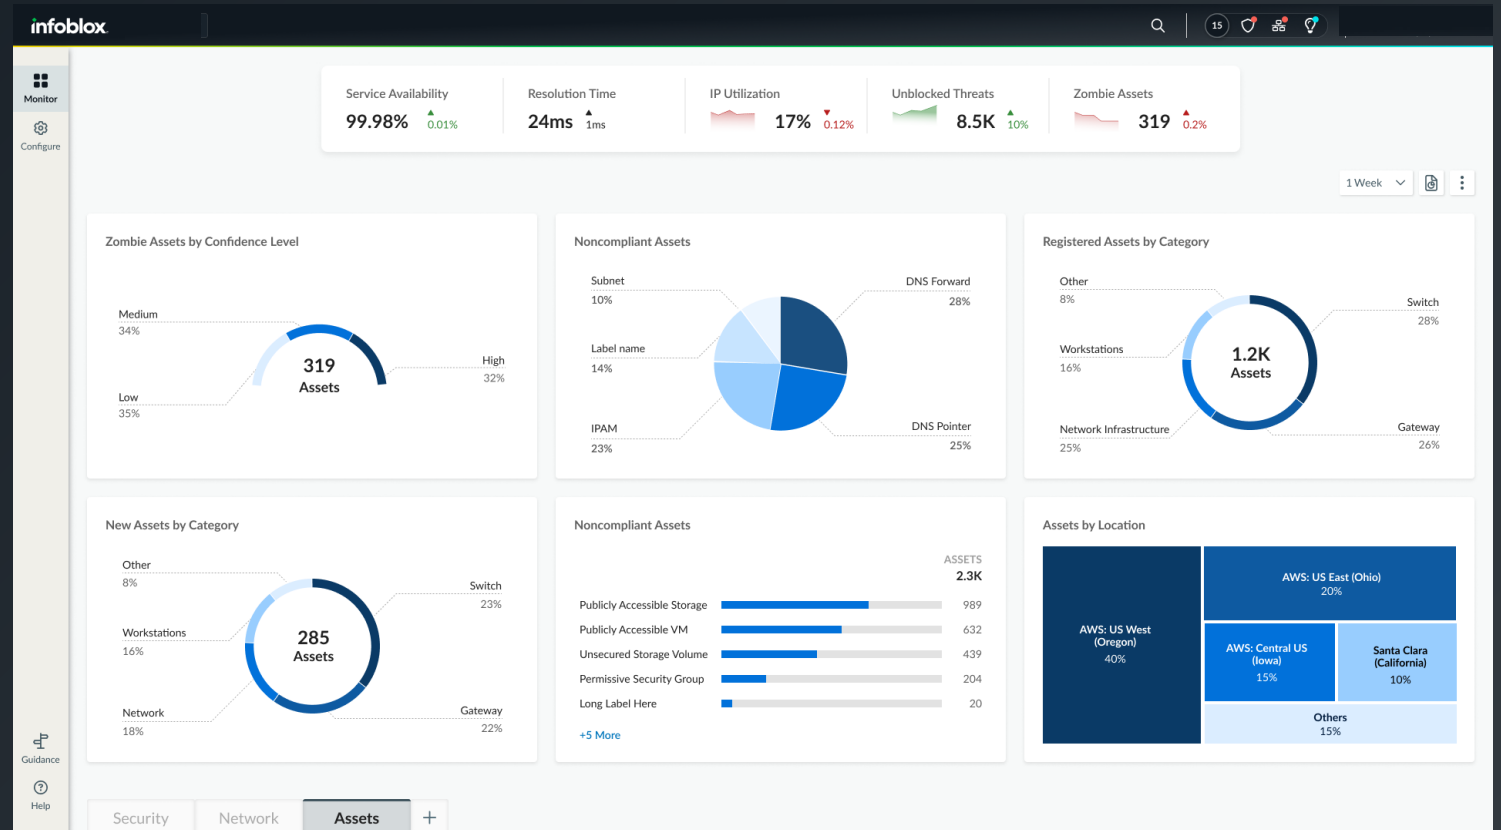

Asset discovery, insights and recommended corrective action

Unified visibility across the entire hybrid, multi-cloud estate

For each asset, we identify attributes, network location, state and relationships among assets

THANK YOU
